

## **Instant Zero modules now reside within ImpressCMS**

**Catégorie : The ImpressCMS Project**

**Publié par david [davidl2] le 2009-11-19**

Recently we all shared the unfortunate news that Instant Zero has decided to end development of their modules, along with the closure of their business and website. This came as a tremendous shock and loss to not only ImpressCMS but XOOPS as well. Both communities were left wondering what was to happen to such useful modules, which are widely used across a large percentage of XOOPS and ImpressCMS powered websites.

After consulting with Hervé Thouzard, the owner of Instant Zero, it is with great pleasure that we are announcing that ImpressCMS is able to offer support and continued development of some of Instant Zero's modules.

Without any doubt we are sure that everyone will agree that regardless of the paths we choose, Hervé has been an inspiration and cornerstone within our projects, he was a driving force in high quality module development. His dedication and willingness to help others over the years has been an inspiration and will sadly be missed from all of our hearts.

As a project we realise that this is a dark time losing a highly talented developer. Any time an open source project loses such a talented developer, it can be a serious loss. We also acknowledge that such a loss would have an irreparable impact on our communities, and because of this we approached Hervé for his kind permission to continue support and development of those modules that we feel will benefit both communities the most.

Here are a few words from Hervé:

"The ImpressCMS project have my complete blessings in releasing and continue the development of the Instant Zero community modules. I truly believe that this is the very best solution for the users and the module themselves"

Beginning immediately, ImpressCMS will be taking over development of the following Instant Zero modules:

- \* Birthday
- \* Boox
- \* Newbexx
- \* iSearch
- \* Marquee
- \* MyDownloads
- \* Myiframe
- \* News
- \* OI@drion (shop)
- \* Shortcuts
- \* Userpage

\* XoopsCare

All modules have now been added to our SVN for their continued development.
