What's this module all about ?

SmartBlocks is a XOOPS module for creating and managing blocks on a page. It is fully integrated with XOOPS permissions, the XOOPS blocks system, and can automatically pull content from any block in the system.

[adsense]88cfb359a07dd4722d73712b88208305[/adsense]

Modules can broadcast available pages and have them added to the page hierarchy.

What's the current version ?

Current version of the module can be downloaded here :

- SmartBlocks: [Zip Version](#)

Where can I see this module in action

There is currently no official demo site

There is also a development site ?

SmartBlocks has its own project on the [XOOPS Developers Forge](#). The different trackers are hosted there.
